

Excitement Reigns at Howard Kennedy School as 350 Youngsters Move Into \$443,172 Annex

Pre-school peek at new kindergarten . . . From left, Jimmy Schneider, Antoinette Scott, Marsha Dean, Melvin Spencer, Nathaniel Jones and Teacher Lula Jones.

An early Christmas excitement at Howard Kennedy School Monday morning was understandable. Some 350 of the school's 861 students had a big, gleaming package to open: the new \$443,172 annex. Beaming kids peeped in the windows of the eight new classrooms and auditorium-gymnasium before school.

Then at 9 a. m. kindergarten through third grade pupils picked up their books for a mass move into the new building. Said Mrs. Zell R. Sahn, principal: "Now for the first time each class will have its own room. And most important, this is the first day that all the children will

have a full day of school." Because of the crowded conditions in the old building, the first through third grades were on half-day schedules. The biggest oooohs and aaaahs from the kids came at the sight of a shiny tile planter and their own personal lockers lining the gleaming halls.

Moving-day parade at Howard Kennedy . . . Like opening up a big Christmas package.

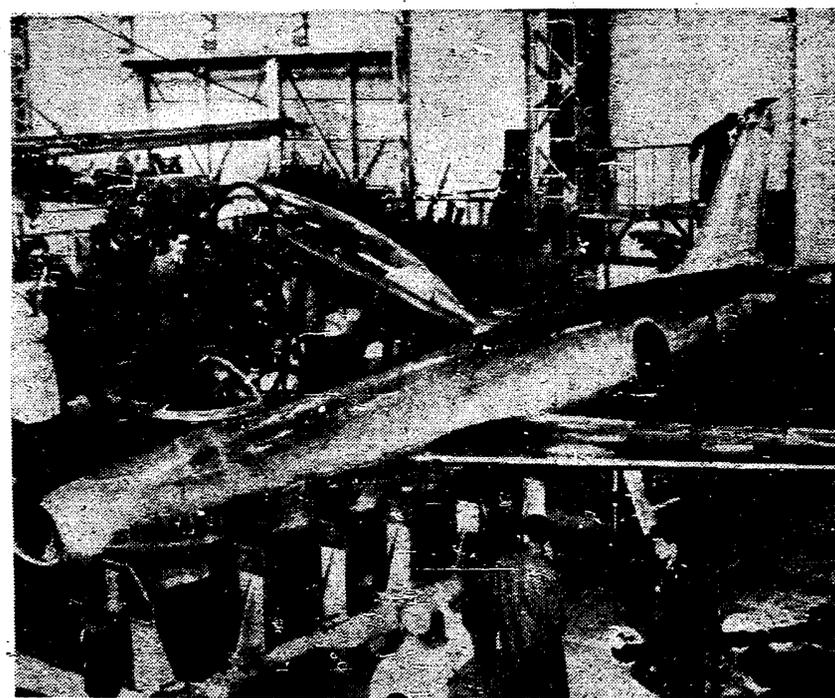

Wide-eyed introduction to new classroom . . . "All the children are thrilled to death."

New lobby planter steals the show . . . From left, Howard Stevenson, Jayne Russ, Carol Kellogg, Darren Taylor and custodian Martin Broadus.

"Boy! A new locker just for me" . . . Mrs. Ardis Corey makes assignments.

Japan Shows Off Its First Jets

This medium jet trainer is one of the first three jet planes manufactured in Japan. It was shown to newsmen recently at the Fuji

Heavy Industries Plant near Tokyo. The three planes were designed in Japan and are equipped with British-made Bristol Orpheus jet

engines. They have a 40-foot fuselage with a 34½-foot wing span. They are to be used by the Japanese Air Defense Force.
